For 'live' Kingfisher updates of offshore activities follow [@KingfisherInfo](#) on Twitter**Marine Licence**First Published: 5 January 2015 | **Latest Update: 5 January 2015****New Marine Licence for Marine Aggregate Dredging – Area 515 Humber**

On behalf of Westminster Gravels Limited this notice is to advise that a Marine Licence for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) to allow the continuation of dredging within Area 515 (formerly Area 440 and 441/2).

It is anticipated that dredging under the new Marine Licence will commence on 1st January 2015.

As required by the Fisheries Code of Practice, Masters of dredging vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

Notice To FishermenFirst Published: 14 August 2014 | **Latest Update: 14 August 2014****Regional Active Dredge Area Charts – Issue 24 now available**

Regional Active Dredge Area (RADA) charts are routinely produced by the British Marine Aggregate Producers Association (BMAPA) and The Crown Estate on a bi-annual basis (charts are dated 31st January and 31st July) to show where dredging operations are currently permitted within existing marine aggregate production licences.

Areas where dredging is permitted are monitored through the approved Electronic Monitoring System (EMS) that is required to be installed on every marine aggregate dredger operating in UK waters.

Issue 24 of these charts (dated 31st July 2014) is now available to be downloaded from http://www.bmapa.org/issues/other_sea_users.php

The need for working areas within production licences can be defined through existing licence conditions or through individual marine aggregate operators' voluntary management arrangements.

Any changes in area or zone from the previous issue (dated 31st January 2014) will be highlighted in red.

Hard copy laminated versions of these charts have been provided to local MMO offices for circulation to local fisheries interests, and hard copies can also be obtained by contacting bmapa@mineralproducts.org

For further information on these charts can be obtained by contacting: bmapa@mineralproducts.org

New Marine Licence for Marine Aggregate Dredging – Area 514

On behalf of CEMEX UK Marine Limited this notice is to advise that, a Marine Licence (L/2014/00399/1) for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) to allow dredging on Area 514. The duration of the licence is 15 years.

Parts of Area 514 are dredged at present under Marine Licences for Areas 102 and 105. Operations will continue under the new Marine Licence from 1st January 2015.

As required by the Fisheries Code of Practice, Masters of Dredging vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10 nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.
