STAY UP TO DATE - ALWAYS ENSURE YOU HAVE THE LATEST KINGFISHER BULLETIN AND OFFSHORE FISHING PLOTTER DATA ON-BOARD.

Support

The Kingfisher Bulletin is provided by the Kingfisher Information Service of Seafish, to promote the awareness of offshore hazards to fishing, new structures and zones and conflicting offshore operations. Support for the production of subsea cables industry information is received from The Crown Estate and the European Subsea Cables Association (ESCA).

Information

Information contained within the Kingfisher Bulletin comes from a variety of sources, although is in the majority, supplied directly to Kingfisher from the offshore operating industry, or government licensing authorities.

Coordinates within the Kingfisher Bulletin are converted into World Geodetic System 1984 (WGS84) and displayed as degrees, minutes and decimal minutes, to three decimal places (ddd°mm.mmm'). Route or boundary coordinates may be simplified for ease of use.

Disclaimer and Limitation of Liability

Whilst reasonable steps have been taken to ensure its accuracy, the data contained in this Bulletin ("Bulletin Data") is not verified. Neither Seafish nor The Crown Estate or the European Subsea Cables Association (ESCA) (together the "Parties" and each a "Party") makes any warranty, express or implied, as to accuracy, completeness or suitability for any particular purpose of the Bulletin Data. Except for any liability which cannot be excluded or limited by applicable law, none of the Parties shall have any liability to You, meaning any person, firm, partnership, corporate body or any other legal person receiving or otherwise using, or benefitting from the use of, Bulletin Data for any damage or losses (including indirect, incidental, special or consequential loss or damage) caused by any: (i) use of the Bulletin Data, or (ii) error or omission in the Bulletin Data. Notwithstanding the foregoing exclusion of liability, in the event that any of the Parties are found liable to You, then the Parties' entire liability in such event, whether in contract, delict (including negligence) or otherwise, shall not exceed £1,000. The Admiralty Notices to Mariners should also be consulted.

KIS-ORCA Information – 2018 Now Available

The latest release of the KIS-ORCA data is now being distributed to fishermen and is available to download [here](#).

KIS-ORCA Data 2018 contains the latest renewables and cable information and is available for the following fishing plotter systems: Sodena, Maxsea, Olex, Penta, SIS MicroPlot, Transas Navifisher, Litton FishMaster, TMPlanner Quodfish, Trax and also your FishSAFE Unit.

For further information: Kingfisher Information, using the details at the foot of this page.

Survey – Proposed HAVFRUE Cable Route (North of Scotland)

North of Scotland, the MV Fugro Discovery is conducting Route Survey operations for the proposed HAVFRUE Subsea Cable System in the zone highlighted to the North of Scotland.

Current position: 59°44.946'N 006°31.925'W

Please click on the Map Link (top right) for more information.

North Sea Link Project – Landing and deep water Installation Cable 7

Planned works for the First Campaign relevant the Cable 7 using the vessels Giulio Verne, Grand Canyon and Rockpiper. These works will be carried out in the from the coast of Blyth as described below starting from May 2018 until end of September 2018

During the First Campaign, cable7 Pole 1&2 NSL HVDC cable will be landed at Blyth (U.K.) and surface laid on the seabed by using the Cable Laying vessel Giulio Verne (IMO 8302014; Call Sign IBPU) from about KP715 to KP644.

The First Campaign, cable7 will then be protected by Post Lay Installation Burial (PLIB) works using two vessels the Grand Canyon (IMO 9583861; Call Sign SBML3) and the Rockpiper (IMO 9614608; Call Sign LACX8). See table 1 for details of First Campaign, cable 7.

Vessels are requested to pass at a safe speed and distance and fishing vessels are advised to remain a safe distance (approximately 1.5 nautical miles) from the areas identified. Guard Vessels will be deployed at each location to aid in monitoring the exposed areas and will advise of safe distances locally.

The vessels will monitor VHF Channel 16 at all times.

For further information: Jonathan Kerr, Brown & May Ltd, Tel: 01379 872143 email: jonathan@brownmay.com

Notice To FishermenFirst Published: 09 August 2018 | **Latest Update: 13 August 2018****Concerto North – Emergency Cable Repair**

Global Marine has been contracted to undertake two emergency repair operations on the Concerto North submarine fibre optic telecommunications cable in the UK EEZ of the North Sea.

The CS Sovereign has now completed its first repair and is now on passage to its second repair location

1st repair location (A): 52°17.307'N 02°18.837'E

2nd repair location (B): 52°21.1841'N 02°50.6465'E

The duration of both cable repairs is expected to be approximately 20 days in total however this is dependent on weather and other operational conditions. Details of the operations are contained in the attached 'Concerto_North CWN_186'.

Please distribute this information accordingly so that other sea users are aware. The vessel will be limited in manoeuvrability. Other vessels should maintain a distance of at least 1NM from the cable ship during operations, and 1/4NM from any cable buoys in place during the course of the repair for safety. Please contact myself or Steven Bennett (Assistant Maintenance Agreement Manager) if you have any queries regarding this notification or if you have any information on any underwater activity in this area that is relevant to the proposed operation.

For further information: Alex Riddell, Global Marine, Tel: +44 1245 702111 email: alex.riddell@globalmarine.group

**Notice To Fishermen**First Published: 14 June 2018 | **Latest Update: 07 August 2018****Nemo Link – Cable Burial, Jointing, Rock Replacement**

Mariners are advised that the Nemo-Link project will be carrying out subsea operations along the cable route with the vessel 'SKANDI CONSTRUCTOR'.

Operations will be conducted typically as follows:

- Short trenching trial at KP65.7: 51°18.909'N 002°15.414'E
- Trenching at KP90: 51°19.589'N 001°54.377'E
- Trenching at KP43: 51°21.237'N 002°33.263'E

The following execution window is anticipated for the duration of this Notice:

- SKANDI CONSTRUCTOR Trenching Operations - 27/07/18 – 20/08/18

The rock placement shall be conducted from the 'Simon Stevin' vessel deploying a fall pipe.

The works within the Belgian Waters should span approximately 3 weeks, though work will not be continuous (i.e. in-survey may be conducted approx. 1 week in advance of the rock installation work).

Belgian waters operations: 25/07/18 – 10/08/18

The Rock Placement works will consist of the following activities:

- In-survey (vessel mounted MBES)
- Rock placement, including progress surveys
- Out-survey (vessel mounted MBES)

Rock shall be placed along the NEMO cable over existing in-service cables / pipelines at the following locations:

C-Power A	51°20.870'N 002°53.610'E
C-Power B	51°20.894'N 002°53.450'E
Pan European	51°22.000'N 002°32.185'E
Tangerine	51°22.100'N 002°31.037'E
Sea-ME-We 3	51°22.906'N 002°30.166'E
Franpipe	51°21.420'N 002°27.212'E
TAT14	51°20.357'N 002°22.868'E

For further information: NemoMarineCoordinator@Deepoceangroup.com

Aquind Interconnector – Survey Operations

MMT, on behalf of Aquind Ltd, will be carrying out a Geotechnical survey along the proposed UK section of the Aquind Interconnector cable route, between Eastney near Portsmouth and the limit of the UK EEZ

The offshore survey (Blocks 2 and 3) is anticipated to take around 17 days (including weather allowance) starting on 24th July at the earliest (see Figure 1).

Two survey vessels will be used due to water depth variation along the route.

- The OSV Cecilia (54m) will conduct the offshore survey and operate in Blocks 2 and 3.

For further information: Brown & May Jonathan Keer, Tel: 01379 872 143 / 07850 604851 email: jonathan@brownmay.com

Notice to Fishermen

Published: 23 August 2018 | Latest Update: 23 August 2018

IFA2 Interconnector Project – Boulder Clearance Chilling & Daedalus

Mariners are advised about boulder clearance works between Chilling and Daedalus for the IFA2 project, which is a HVDC electricity transmission interconnector between France and England across the English Channel. The boulder clearance works will be carried out by divers and are planned to commence on 21st August with expected completion in UK waters by mid September.

The UK nearshore area is located between Chilling Brownwich and Daedalus. The boulder clearance will be performed all along the HVAC and HVDC route (partially and up to 10m LAT UK side) before the cable installation preparation works. KP 201 is considered the limit for the 10m LAT. Pre and post operations surveys will be made using a vessel based Multi Beam Echo Sounder (MBES), along the IFA2 nearshore cable routes between Chilling and Daedalus.

Multi Beam Echo Sounder pre operations survey will be undertaken on 14th and 15th August 2018. The expected duration of the boulder clearance works is 16 days (24hr operations) commencing 21st August 2018, starting at the Chilling end of the route and progressing toward Daedalus.

The Boulder Clearance marine works are being carried out by BRIGGS MARINE CONTRACTORS (BMC) using the following vessels/barge:

- Solent Guardian Call Sign 2GDK7) shallow draft survey vessel for the pre and post operations surveys using a vessel based Multi Beam Echo Sounder (MBES).
- Forth Trojan Call Sign 2FYM4) Tug vessel as tow and anchor handler for the barge.
- Harry McGill (Call Sign GYRU) MPV Crane barge as the dive support platform from which to undertake shallow water boulder clearance.
- CRC Lodestar Call Sign MCQS8) RIB type transfer vessel for conducting crew transfer operations from shore to the barge and as a guard vessel where needed.

For further information: Jonathan Kerr, Brown & May Ltd, Tel: 01379 872143 email: jonathan@brownmay.com

Western HVDC Link – Inshore Cables Operations

Mariners are advised that the operations indicated in the previous Notices to Mariners on an inshore section of the Western Link power cable are still ongoing. These operations are being carried out approximately 1.7km from the southern landfall of the cable on the Wirral. Details of the operations are provided in a Notice to Mariners that can be downloaded [here](#) and is summarised below.

Location

This work is being carried out at the location specified below:-

- **Liverpool Bay:** in an area approximately 1.7km from the Wirral shore, extending for 200m between the points 053°25.557'N 003°07.894'W to 053°25.665'N 003°08.001'W.

A map showing the location of the work is given in the Notice to Mariners which can be downloaded [here](#).

Vessel details

Details of the vessel involved in these operations, along with the present location can be found on MarineTraffic.com via the links below:-

- [Atlantis](#): Shallow water vessel | Call sign ORKN
- [Wave Walker 1](#): Jack up barge | Call sign PBVH
- [Stemat 82](#): Multipurpose barge | Call sign PBRF
- [Wind](#): Jack up barge | Call sign OXSW2

The vessels involved in this work will be restricted in the ability to manoeuvre and other vessels are reminded to pass at a safe speed and distance. Fishing vessels are advised to remain a safe distance (approximately 1.5 nautical miles) from the area identified in the Notice to Mariners.

Notices to Mariners

The Notices to Mariners that are presently in place for this project are:-

- **Western HVDC Link: Cable Operations, June 2018** - this notice is described above. It was issued on the 26th June 2018 and provides additional information about operations in Liverpool Bay close to the Wirral landfall. The Notice to Mariners can be downloaded [here](#).
- **Western HVDC Link: Cable Operations, May 2018** - this notice was issued on the 15th May 2018 and provides additional information about operations in Liverpool Bay close to the Wirral landfall. The Notice to Mariners can be downloaded [here](#).
- **Western HVDC Link: Cable Operations, May 2018** - this notice was issued on the 4th May 2018 and provides information about operations in Liverpool Bay close to the Wirral landfall. The Notice to Mariners can be downloaded [here](#).

A copy of this update is also posted on the [website](#).

Moyle Interconnector – Survey

Mariners are advised that marine geophysical survey work will commence in the North Channel over both the Moyle Interconnector Cable and the Scotland to Northern Ireland Pipeline in August 2018. A Notice to Mariners describing the work can be downloaded [here](#) and is summarised below.

Survey work

Geophysical survey work is due to be carried out by two vessels (detailed below). The vessels will survey the route of both the Moyle Interconnector cable and the Scotland to Northern Ireland Pipeline (SNIP) in the North Channel between Northern Ireland and Scotland.

The nearshore survey work is due to take place between the 14th August 2018 - 28th September. The offshore survey work is due to start on the 24th August and to be completed by the 18th September.

The location of the survey area is illustrated in the Notice to Mariners that can be downloaded [here](#).

Vessel details

Details of the vessels involved in these operations, along with their present location can be found on MarineTraffic.com via the links below:-

- Inshore survey: *MV Titan Discovery* | Call sign 2HCR3
- Offshore survey: *Geosund* | Call sign LAC18

Both survey vessels will be towing survey equipment at all times. All mariners are requested to maintain a safe distance (500m) from the survey vessels at all times.

The vessels will monitor VHF Channel 16 at all times and can be contacted on this channel.

For further information: Jim Andrews, Fisheries Liaison Officer, Tel: +44(0)7908225865, Email: jim@awjmarine.co.uk (Emergency: 07508 008515)
