Notice to Fishermen

First Published: 01 August 2012 | **Latest Update: 01 August 2012**

Regional Active Dredge Area Charts – Issue 20 now available

Regional Active Dredge Area (RADA) charts are produced by the British Marine Aggregate Producers Association (BMAPA) and The Crown Estate on a bi-annual basis (charts are dated 31st January and 31st July) to show where dredging operations are currently permitted within existing marine aggregate production licences.

Areas where dredging is permitted are monitored through the approved Electronic Monitoring System (EMS) that is required to be installed on every marine aggregate dredger operating in UK waters.

The 20th issue of these charts, dated 31st July 2012, are now available to be downloaded from http://www.bmapa.org/issues/other_sea_users.php

The need for working areas within production licences can be defined through existing licence conditions or through individual marine aggregate operators' voluntary management arrangements.

Any changes in area or zone from the previous issue (dated 31st January 2012) will be highlighted in red.

For further information on these charts can be obtained by contacting: bmapa@mineralproducts.org

Snagging Hazard – Obstruction

Please note that there is an Aggregate draghead unit is approximately 3.2m in length and 2.2m in width. If lying flat, it is 1m tall, but as it is jointed and depending upon how it lies on the seabed could be a bit higher. It weights approximately 4500kg.

Position: 52°32.160'N 002°07.830'E
