### Survey Activity

First Published: 31 July 2013 | **Latest Update: 31 July 2013**

#### Benthic Ecology Survey – Outer Thames Estuary

A benthic ecology survey will be undertaken on will be undertaken on board the survey vessel. The vessel will deploy a benthic grab sampler directly to the seabed from the stern of the vessel. In addition, a 2m beam trawl will be deployed at selected locations and will be towed for a distance of approximately 500m on the seabed.

#### Benthic Ecology Survey – South Coast of England in the English Channel

A benthic ecology survey will be undertaken on board the three survey vessels listed. The vessels will undertake a variety of work. A benthic grab sampler will be deployed directly to the seabed from the stern of the MV Ocean Dawn. A video system will also be deployed from the Ocean Dawn and the Morven, and will undertake transects on the seabed up to approximately 300m in length. In addition, a 2m beam trawl will be deployed from the Ocean Dawn, at selected locations and will be towed for a distance of approximately 500m on the seabed. The fisheries survey on the Sara Lena will be conducting 4m commercial beam trawling, deploying two 4m beam trawls from each side of the vessel. Additionally, two scallop dredgers will also be deployed.

## Marine Licence

First Published: 4 December 2012 | **Latest Updated: 10 December 2012**

### South Hastings – New Marine licence for Marine Aggregate Dredging

On behalf of CEMEX UK Marine Limited, Hanson Aggregates Marine Limited and Tarmac Marine Dredging Limited this is to advise that a Marine Licence for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) for a new area (Area 460, South Hastings).

It is anticipated that operations will commence on or after 3rd January 2013 and the duration of the Licence is 15 years.

As required by the Fisheries Code of Practice, Masters of Dredging vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10 nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

## Marine License

First Published: 11 February 2013 | **Latest Updated: 11 February 2013**

### S.East of St. Catherine's Point – New Marine licence for Marine Aggregate Dredging

On behalf of CEMEX UK Marine Limited, this is to advise that a Marine Licence for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) for a previously dredged area (Area 407, south east of St Catherine's Point).

It is anticipated that operations will commence on or after 14th March 2013 and the duration of the Licence is 15 years.

As required by the Fisheries Code of Practice, Masters of Dredging vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10 nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

## Notice to Fishermen

First Published: 02 August 2013 | **Latest Update: 02 August 2013**

### Regional Active Dredge Area Charts – Issue 22 now available

Regional Active Dredge Area (RADA) charts are routinely produced by the British Marine Aggregate Producers Association (BMAPA) and The Crown Estate on a bi-annual basis (charts are dated 31st January and 31st July) to show where dredging operations are currently permitted within existing marine aggregate production licences.

Areas where dredging is permitted are monitored through the approved Electronic Monitoring System (EMS) that is required to be installed on every marine aggregate dredger operating in UK waters.

Issue 22 of these charts (dated 31st July 2013) is now available to be downloaded from [http://www.bmapa.org/issues/other\\_sea\\_users.php](http://www.bmapa.org/issues/other_sea_users.php)

The need for working areas within production licences can be defined through existing licence conditions or through individual marine aggregate operators' voluntary management arrangements.

Any changes in area or zone from the previous issue (dated 31st January 2013) will be highlighted in red.

*For further information on these charts can be obtained by contacting:* [bmapa@mineralproducts.org](mailto:bmapa@mineralproducts.org)
