Change of active dredging zone for aggregates licence –Anglian Region (Area 254)

**This is to advise that Tarmac Marine Ltd will be changing the active dredging zone of licence area 254 off Great Yarmouth in one month's time.**

Dredging operations will move from the southern active dredge zone to the northern for the remainder of the licence term. The dredgers most commonly seen in area 254 are Tarmac Marine's City of London and City of Westminster.

## Regional Active Dredge Area Charts – Issue 26 now available

Regional Active Dredge Area (RADA) charts are routinely produced by the British Marine Aggregate Producers Association (BMAPA) and The Crown Estate on a bi-annual basis (charts are dated 31st January and 31st July) to show where dredging operations are currently permitted within existing marine aggregate production licences.

Areas where dredging is permitted are monitored through the approved Electronic Monitoring System (EMS) that is required to be installed on every marine aggregate dredger operating in UK waters.

Issue 26 of these charts (dated 31st July 2015) is now available to be downloaded from [http://www.bmapa.org/issues/other\\_sea\\_users.php](http://www.bmapa.org/issues/other_sea_users.php)

The need for working areas within production licences can be defined through existing licence conditions or through individual marine aggregate operators' voluntary management arrangements.

Any changes in area or zone from the previous issue (dated 31st January 2015) will be highlighted in red.

Hard copy laminated versions of these charts have been provided to local MMO offices for circulation to local fisheries interests, and hard copies can also be obtained by contacting [bmapa@mineralproducts.org](mailto:bmapa@mineralproducts.org).

*For further information on these charts can be obtained by contacting: [bmapa@mineralproducts.org](mailto:bmapa@mineralproducts.org)*

## Marine Aggregate Notification – East Anglian Obstruction

Please be advised that during the salvage operation of a Hanson Aggregates Marine Ltd owned and operated dredging vessel, it was required to release the anchor chain to allow the operation to proceed. The anchor chain, with attached anchor, was deposited at the position: 52°32.600'N 01°53.600'E within Hanson's aggregate extraction Licence Area 240.

The anchor chain (with attached anchor) is large and heavy enough to act as an obstruction on the seabed, potentially causing damage to towed fishing gear. The anchor was deposited with approximately 135m of anchor chain attached to it.

At this time there are no plans to recover this obstruction. Should a recovery attempt be made then advanced notification will be given.

For further information, please contact: Louise Mann, Hanson Aggregates, Email: [louise.mann@hanson.biz](mailto:louise.mann@hanson.biz) Tel: +44 (0) 7583 158393

## New Marine Licence for Marine Aggregate Dredging – (Area 510/2)

On behalf of CEMEX UK Marine Limited, this is to advise that a Marine Licence for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) for Area 510/2 in the Outer Thames Estuary.

It is anticipated that operations will commence on or after 23rd July 2015 and the duration of the Licence is 15 years.

As required by the Fisheries Code of Practice, Masters of Dredging vessels will call up on VHF 16 when approaching the dredging area at a range of 10nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

## Marine Aggregate Survey Notification – Outer Thames Estuary Obstruction

Please be advised that during the ongoing regional seabed monitoring survey works for the marine aggregate industry a benthic grab was lost at the position:

51°49.764'N 01°32.306'E

The benthic grab consists of a large steel bucket held within a solid 1 m3 support frame. This grab was lost with a short length of steel cable attached to it. It was unclear if the grab was caught on the seabed at the time of loss or if there was a cable failure as such it is unknown if this obstruction is fixed/caught on the seabed.

At this time there are no plans to recover this obstruction. Should an attempt to recover this grab be made then advanced notification will be given. This notification is intended for circulation to all interested parties undertaking activities in the vicinity of the obstruction. If you would like further details regarding this matter please contact the RSMP Coordinator or the Fishing Liaison representative using the contact details at the head of this communication.

For further information, please contact: Phil Latto, Marine Space, Tel: +44(0)2380 381945, Email: [phil.latto@marinespace.co.uk](mailto:phil.latto@marinespace.co.uk)

**Survey**First Published: 24 September 2015 | **Latest Update: 24 September 2015****Marine Aggregate Survey – Humber Region**

**Between the 19th and 30th September 2015 the marine aggregate industry will be undertaking seabed grab surveys at the locations**

These works are required to comply with monitoring conditions attached to Marine Licences for marine aggregate areas, and the surveys will employ a Hamon grab to obtain sediment samples of the seabed. A drop down video system may also be employed at locations where grab surveys are unsuccessful in acquiring sediment samples.

The works will be completed by personnel from Marine Ecological Surveys (MES) Ltd on the vessel Solent Guardian operated by Briggs Marine Ltd. The survey operations do not involve towed survey equipment.

On behalf of CEMEX Marine Ltd, Hanson Aggregates Marine Ltd and Lafarge Tarmac Marine Ltd this notice is to advise that geophysical surveys are due to commence shortly in existing marine aggregate extraction Areas 377 and 472 in the Bristol Channel region. The survey of Area 472 will also include a survey of an area extending out from the extraction area which has successfully been tendered for with The Crown Estate.

It is anticipated that operations will commence on or after 24th July 2015 and take approximately 2 months to complete.

As required by the Fisheries Code of Practice, Masters of vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10 nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the vessel and fishing vessel(s) if required.
