Marine Aggregate Survey – Bream Nest Areas 396, 435, 122

Fugro EMU Limited will be conducting a geophysical and ecological/benthic survey

RV Discovery (call sign 2AEL8), a 24 m former fishing vessel, will be conducting a geophysical survey of Area 435/396 and the Bream Areas with towed equipment up to 200 m behind the vessel. The vessel will be operating on a 24 hour basis.

RV Discovery (call sign 2AEL8), a 24 m former fishing vessel, will also be conducting a hydrographic survey of Area 122/123 A and B, with no towed equipment.

FPV Morven (call sign MBF06) a 20 m former fisheries patrol vessel, will be conducting an ecological survey with towed equipment up to 50 m behind the vessel.

Vessel	Minimum days on site	Earliest	Earliest	Latest
	-	Start Date	Stop Date	Stop Date
RV Discovery	6	8 May 2015	14 May 2015	5 June 2015

Survey Marine Aggregate S	Survey – Anglia Area			est Update: 13 May 2015	
On behalf of Hanson Aggregates Marine Ltd this notice is to advise that a vibrocore sampling campaign is due to commence shortly in existing marine aggregate extraction Areas 401/2, 328 and 242-361 and pre-application Area 495 in the Anglian region.					
It is anticipated that operations will commence on or after 4th May 2015 and take approximately 1 month As required by the Fisheries Code of Practice, Masters of vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10 nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the vessel and fishing vessel(s) if required.

Both documents can be viewed via this webpage: http://www.bmapa.org/issues/other_sea_users.php The usefulness and effectiveness of this approach will continue to be reviewed at formal meetings of the liaison committee, the next of which will be arranged to take place at a suitable East coast venue in June/July 2015. Details of the venue and timing will be circulated 8 weeks prior to the meeting date. The marine aggregate industry remain committed to maintaining the levels of liaison and engagement with the commercial fishing sector. Therefore if any issues arise outside of the established liaison committee meeting cycle that are unable to be resolved through						
 to trial some alternative arrangements from June 2012 onwards. These would see a single annual liaison committee meeting taking place during the summer (June/July), with the traditional winter meeting replaced by a written Issues Update which would be circulated electronically. The production of the Issues Update and its circulation would be coordinated by the British Marine Aggregate Producers Association. The thinking behind this change was that the lines of communication and contacts were now sufficiently well developed to allow any site specific liaison issues to be addressed on a bi-lateral basis between the parties concerned. As a consequence, the committee had evolved towards a platform to report updated general information against standing agenda items. Rather than holding a winter meeting for this purpose, it was agreed that these updates could potentially be achieved equally well via a written report. Following discussions at the liaison committee meeting which took place on the 24th June 2014, it was agreed to continue with this approach. The third of these Issues Updates is now available, together with a separate document provided by MMO which provides an update on the status of all licences and applications in the Eastern region. Both documents can be viewed via this webpage: http://www.bmapa.org/issues/other_sea_users.php The usefulness and effectiveness of this approach will continue to be reviewed at formal meetings of the liaison committee, the next of which will be arranged to take place at a suitable East coast venue in June/July 2015. Details of the venue and timing will be circulated 8 weeks prior to the meeting date. The marine aggregate industry remain committed to maintaining the levels of liaison and engagement with the commercial fishing sector. Therefore if any issues arise outside of the established liaison committee meeting cycle that are unable to be resolved through bi-lateral discussions, there is the option
