

Market Insight

Introduction

Our team of market analysts collate a broad spectrum of reports and insights relating to the UK seafood market from landing, trade, retail and foodservice perspectives. The team analyse these sources and regularly communicates relevant trends. This insight enables stakeholders to make informed decisions, and devise strategies and approaches based on robust information.

Market insight is provided in various ways:

- **Regular market reports are freely available online to seafood businesses.**
- **Bespoke analysis is provided directly to stakeholders in response to enquiries.**
- **Presentations and publications on key topics are produced and delivered.**

The reports and insights delivered by the team are based on the three themes: Foodservice, Retail and Trade.

Foodservice

Through working with our research partner, we are able to provide a picture of the complex and evolving UK foodservice sector and the role of seafood within it. These reports and presentations provide an update on performance and opportunities by channel and are complemented by ad-hoc reports on key topics.

Retail

A complete picture of retail and consumer shopping trends is compiled from various sources for example: Nielsen ScanTrack and HomeScan Data, BrandView price and promotion reports, plus retail and consumer trends overviews from the Institute of Grocery Distribution (IGD).

Our team works in partnership with data providers to produce a range of reports, which are then made available to industry:

- **Monthly retail reports**

- Seafood retail and shopper trends including top line sales trends, consumers purchase KPI's and retailer market shares. These focus on the following areas: Industry Context, Ambient, Cod, Haddock, Pollock, Prawn, Salmon, Scampi & Langoustine, Shellfish and Smoked.
- Overall grocery retailer trends including retailers' share of total spend, the fast moving consumer goods (FMCG) and grocery markets.
- Retailer in-store activity reports including retailers product launches, pricing and promotional activity.

- **Quarterly retail reports**

- Seafish retail summary reports combining insights from retail data, consumer trends and in-store activity to create an industry picture.
- Seafood special reports focusing on specific seafood sectors / species / segments and providing details such as changing shopper habits and demographic profiles.
- Protein comparison reports comparing the performance of seafood against meat and poultry.

Trade

For a complete picture of how seafood is trading in the UK, data is collated from several sources:

- Seafood imports and exports data from the Her Majesty's Revenue & Customs (HMRC) is updated monthly but released two months in arrears. This data offers details of seafood

product imports and exports to and from the UK by country, species and product format for the current month and year-to-date, in both quantity and value. We also produce an annual trade summary presentation.

- Globefish reports provide details on international seafood trade, supply, pricing and trends.
- Seafood landing and quota uptake data for the UK from the Marine Management Organisation.
- Seafish seafood value chain map relates to the values of the different sectors of the UK seafood industry including purchases by UK consumers.

Factsheets

We consolidate market data into a series of factsheets providing overviews of key sectors and species, including market performance and consumer trends. These factsheets are available on the Seafish website.

Keeping up to date with the latest trends

Our market data is freely available to seafood businesses. We issue a monthly newsletter letting you know when the latest data is available. Contact us to subscribe.
