Support

The Kingfisher Bulletin is provided by the Kingfisher Information Service of Seafish, to promote the awareness of offshore hazards to fishing, new structures and zones and conflicting offshore operations. Support for the production of subsea cables industry information is received from The Crown Estate and the European Subsea Cables Association (ESCA).

Information

Information contained within the Kingfisher Bulletin comes from a variety of sources, although is in the majority, supplied directly to Kingfisher from the offshore operating industry, or government licensing authorities.

Coordinates within the Kingfisher Bulletin are converted into World Geodetic System 1984 (WGS84) and displayed as degrees, minutes and decimal minutes, to three decimal places (ddd°mm.mmm'). Route or boundary coordinates may be simplified for ease of use.

Disclaimer and Limitation of Liability

Whilst reasonable steps have been taken to ensure its accuracy, the data contained in this Bulletin ("Bulletin Data") is not verified. Neither Seafish nor The Crown Estate or the European Subsea Cables Association (ESCA) (together the "Parties" and each a "Party") makes any warranty, express or implied, as to accuracy, completeness or suitability for any particular purpose of the Bulletin Data. Except for any liability which cannot be excluded or limited by applicable law, none of the Parties shall have any liability to You, meaning any person, firm, partnership, corporate body or any other legal person receiving or otherwise using, or benefitting from the use of, Bulletin Data for any damage or losses (including indirect, incidental, special or consequential loss or damage) caused by any: (i) use of the Bulletin Data, or (ii) error or omission in the Bulletin Data. Notwithstanding the foregoing exclusion of liability, in the event that any of the Parties are found liable to You, then the Parties' entire liability in such event, whether in contract, delict (including negligence) or otherwise, shall not exceed £1,000. The Admiralty Notices to Mariners should also be consulted.

Notice To Fishermen

First Published: 25 January 2018 | Latest Update: 25 January 2018

KIS-ORCA Information – 2018 Now Available

The latest release of the KIS-ORCA data is now being distributed to fishermen and is available to download [here](#).

KIS-ORCA Data 2018 contains the latest renewables and cable information and is available for the following fishing plotter systems: Sodena, Maxsea, Olex, Penta, SIS MicroPlot, Transas Navifisher, Litton FishMaster, TMPlanner Quodfish, Trax and also your FishSAFE Unit.

For further information: Kingfisher Information, using the details at the foot of this page.

Notice To Fishermen

Caithness - Moray HVDC Link – Dropped Object

 Map Link

The Caithness - Moray HVDC Link is a twin bundled High Voltage DC interconnector (single cable diameter 132mm) installed by NKT HV Cables AB for Scottish Hydro Electric Transmission (SHEt) stretching approximately 113 km across the Moray Firth from Portgordon in Moray to Noss Head in Caithness.

The vessel Kommandor Stuart has left a 52kg object (1.4m x 0.4m x 0.4m) on the seabed and an HPR beacon approx. 20m away.

HPR Beacon: 57°45.976'N 002°58.040'W 52Kg Object: 57°45.983'N 002°58.049'W

All vessels are requested to keep clear of these objects which could be on the seabed for up to 20 days

For further information: Richard Creed, ABB Tel: +44 7802 225532 email: Richard.creed@se.abb.com

Notice To Fishermen

First Published: 20 September 2018 | Latest Update: 04 October 2018

Caithness - Moray HVDC Link – Cable Excavations & Cable Lay

The Caithness - Moray HVDC Link is a twin bundled High Voltage DC interconnector (single cable diameter 132mm) installed by NKT for Scottish Hydro Electric Transmission (SHE Transmission) stretching approximately 113 km across the Moray Firth from Portgordon in Moray to Noss Head in Caithness.

NKT will lay a length of bundled cable in each of the areas shown on the chart above parallel to the existing cable, further work will take place at a later date and will be subject to a new Notice to Mariners. Operations will commence on or around 6 October 2018 and could take up to 20 days depending on the weather.

There is a working area 250m either side of the cable route and other seafarers are requested to keep clear during these operations. Guard vessels will patrol the cable route. CLV Victoria call sign: LAWV7

Cable Lay Area	Cable Lay Area
58°19.31'N 002°41.06'W	57°45.39'N 002°59.38'W

58°19.17'N 002°41.49'W	57°45.52'N 002°59.81'W

NKT will carry out cable excavations at the locations shown on the chart above. Operations will commence on or around 8 October 2018 and could take until the end of October to complete depending on the weather. There is a working area 250m either side of the excavation locations and other seafarers are requested to keep clear during these operations. Guard vessels will patrol the cable route. Olympic Intervention IV call sign: LAFQ3

Caithness - Moray HVDC Link – UXO Survey

The Caithness - Moray HVDC Link is a twin bundled High Voltage DC interconnector installed by NKT HV Cables AB for Scottish Hydro Electric Transmission (SHEt) stretching approximately 113 km across the Moray Firth from Noss Head in Caithness to Portgordon in Moray.

NKT will carry out an additional Unexploded Ordnance (UXO) Survey in 3 locations along the route during the period 15 September to 15 October 2018 using the vessel Kommandor Stuart Call Sign: MPQH3

There is a 250m exclusion zone either side of each survey area and all vessels are requested to keep clear during these operations.

Survey

First Published: 04 October 2018 | Latest Update: 04 October 2018

Scottish Hydro Electric Power Distribution – Survey

Please be advised that Global Marine on behalf of SHEPD will be undertaking inspection work related to submarine electricity cables as below:

The operations will commence during an appropriate weather window following **15 October** and will continue over a planned minimum period of 2 weeks, weather permitting. Vessels Advance Call sign: 2CYG9, Global Symphony Call Sign: C6YY3

The inspections will involve the use of a Remotely Operated Vehicle (ROV) equipped with a full suite of geophysical survey systems (Multi beam Echo Sounder and Side Scan Sonar). The ROV will be operating close to the seabed, at a distance from the vessel (potentially 20m from the MPC Advance and potentially 100m from the Symphony).

The ROV will be towed behind the vessel, and will operate within 1-3m of the seabed, and cable. The ROV will work along the route of the cable. In the water between the ROV and the vessel there will be the umbilical of the ROV – the exclusion zone mentioned below is to ensure passing vessels do not pass between the ROV and the vessel which would risk snagging the equipment, particularly the umbilical.

Shore end coordinates						
Cable ID	Shore end	Latitude	Longitude	Shore end	Latitude	Longitude

Guernsey Electricity Subsea Cable – Survey

Mariners are advised that ROV Survey works are due to commence for the IFA2 project, which is a HVDC electricity transmission interconnector cable between France and England across the English Channel.

Company, Vessel & Call Sign	Area	Area	Start Timeframe & Duration
Deep Locus 2BMQ7	49°15.032'N 002°12.074'W to	49°27.097'N 002°31.937'W	1st October 2018 For 10 Days

For further information, please contact: Francis Murray, Asset Controller & Project (Subsea) Tel: +44(0)1481 241926 ext. 2126 email: francis.murray@electricity.gg

Moyle Interconnector – Survey

Mariners are advised that marine geophysical survey work is being carried out in the North Channel over both the Moyle Interconnector Cable and the Scotland to Northern Ireland Pipeline in **September - October 2018**. Survey work will also be taking place on the Larne Lough Crossing and Belfast Lough Crossing pipelines. An updated Notice to Mariners describing the work can be downloaded [here](#) and is summarised below.

Survey work

Geophysical survey work is due to be carried out by two vessels (detailed below). The vessels will survey the route of the Moyle Interconnector cables, the Scotland to Northern Ireland Pipeline (SNIP) in the North Channel between Northern Ireland and Scotland and also the route of the Larne Lough Crossing and Belfast Lough Crossing pipelines.

The nearshore survey work is ongoing and is due to end **28th September**. The offshore survey work is due to start on the **2nd September** and to be completed by the **3rd October**.

The location of the survey area is illustrated in the Notice to Mariners that can be downloaded [here](#).

Vessel details

Details of the vessels involved in these operations, along with their present location can be found on MarineTraffic.com via the links below:-

- Inshore survey: [MV Titan Discovery](#) | Call sign 2HCR3
- Offshore survey: [Geosund](#) | Call sign LAC18

Both survey vessels will be towing survey equipment at all times. **All mariners are requested to maintain a safe distance (500m) from the survey vessels at all times.**

The vessels will monitor VHF Channel 16 at all times and can be contacted on this channel.
