

A nighttime photograph of a harbor or waterfront. The water in the foreground is dark, with vibrant reflections of red and white lights from buildings and streetlights in the background. The lights are blurred, creating a sense of motion and depth. The overall atmosphere is dark and moody, with the primary light sources being the artificial lights of the city.

# Annual Plan

## 2017-2018

**SEAFISH**  
the authority on seafood

# Welcome from our Chief Executive

**This Annual Plan sets out the programmes and projects that Seafish is committed to deliver in this, the final year (2017/18) of our current Corporate Plan.**

I am delighted to be able to report that the Seafish team is right on track to deliver on its promises within agreed time, cost and quality requirements. All credit is due to our hard working and committed staff who have had to contend with an increased workload arising, in part, from responding to industry requests and enquiries since the EU Referendum outcome back in June 2016.

Of course, just as we look to conclude the current Corporate Plan, 2017/18 will be a year in which we engage extensively with industry, primarily through

our Sector Panels, to define where Seafish should best deploy its resources for the next three years. With such a degree of uncertainty evident at the moment, 'flexibility' is the watch word. I know that everyone involved from the Sector Panels to the Seafish Board to the four Fisheries Administrations and our Seafish staff are all agreed that Seafish's future plans are going to need to be agile and ready to flex in order to respond to whatever challenges arise as the post EU membership trading environment becomes clear.

In the meantime, while future plans are developed, I can assure all Seafish Stakeholders that we will keep calm and carry on delivering to the high Seafish standards that we have established over recent years.

Marcus Coleman  
Chief Executive

**Our mission, vision and high level objectives encapsulate our delivery commitment, while our Seafish values set out how we go about our work.**

### **Our mission:**

**to support a profitable, sustainable and socially responsible future for the seafood industry.**

This mission reflects industry's wish to address every aspect of best practice; to be environmentally sustainable, and to be responsible in terms of social and welfare requirements and in supplying products of suitable quality and integrity.

### **Vision:**

**the authority on seafood.**

Seafish should be the first organisation that comes to mind when seafood data, interpretations or advice are required, so that we are recognised as 'the authority on seafood'. Only by having a high level of expertise, can we provide reliable, authoritative information to consumers, industry, the media and regulators.

### **Seafish values:**

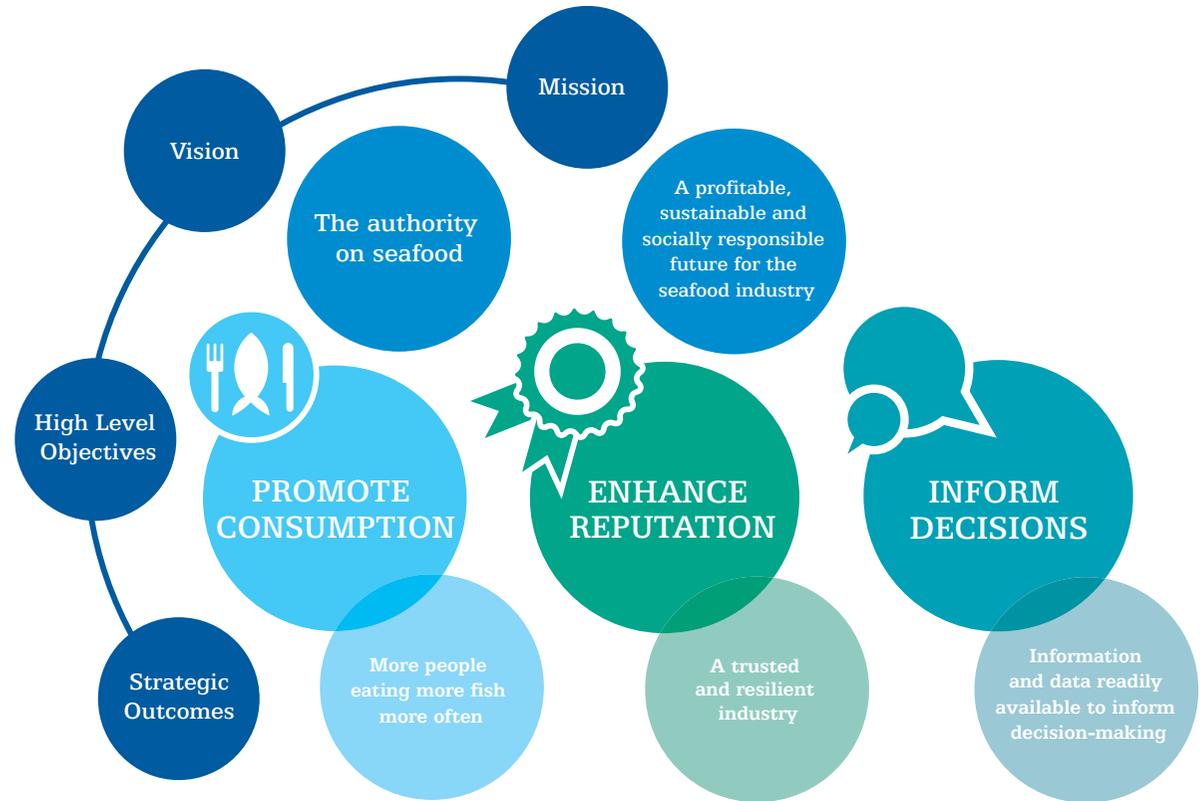

**the guiding principles by which we work.**

Our values have been developed with our staff and are a guide to how we go about our work; they ensure we are at our best for industry by being – accountable, driven, expert, collaborative, innovative and always working with integrity.

# High Level Objectives: promote consumption, enhance reputation, inform decisions

## Operational Delivery

Our plan of work for 2017-18 sets out to deliver 'fewer, bigger, better'. Our three Sector Panels have prioritised key issues, identified areas of focus and allocated resources accordingly. Our work is allied to three High Level Objectives and is subject to regular review by the Sector Panels and Board.

## Promote Consumption

### More people eating more fish more often

A sustainable increase in the consumption of seafood is one of our primary concerns because without consumer demand, there would be no industry to support. Our work to get more people eating more fish more often is shared between our marketing and communications teams, with strong support from our international work programme, which helps exporters deliver their goods to market, and our regional teams, which help spread Seafish value across the UK.

Our promotional work brings together our marketing and PR activity, drawing on a range of tools to grow consumption across all audiences and all industry sectors:

- Our successful Fish is the Dish digital campaign will continue to build our social networks, growing the web audience for our key messages.
- Our new '2-a-week' campaign will establish an all sector platform to drive consumption growth.
- We will expand our Fish and Chips campaign to target the wider foodservice market and further develop our national awards.
- We will target the trade press to build the profile of seafood and to ensure it is valued by retailers and foodservice.
- A full range of support materials will allow our industry partners to add volume to our consumer messages, culminating in a Seafood Week campaign.
- We will expand our acclaimed education programme, engaging schools and further education colleges.

## Enhance reputation

### A trusted and resilient industry

The UK seafood industry has a lot to be proud of and can rightly claim to be leading the world in developing innovative solutions to the challenges of sourcing and supplying seafood.

Our work to enhance reputation is twofold: to support our industry partners to make informed and responsible decisions; and to work with the media to help ensure the industry is better understood. In both strands of work, industry partnership is key.

#### **Our technical teams are supporting that aim through a number of key work programmes including:**

- Our revised Responsible Fishing Scheme (RFS) includes standards on social elements of fishing, including welfare and safety, allowing certified vessels to demonstrate their compliance with best practice and the seafood supply chain to demonstrate its commitment to the same.
- Our Safety and Training work programmes will continue to support workforce skills development and strive to improve safety in our most dangerous occupations.

- The Responsible Fishing Port Scheme aims to assure the UK seafood industry, key stakeholders and seafood supply chain that all certified or engaged ports within this programme are acting in a responsible manner, and will support and develop greater assurance and transparency within the seafood industry.

#### **Our communications programme helps to ensure this good work is better understood by media and consumers:**

- We will develop a range of innovative tools, helping to communicate the industry through film, infographics, reports, case studies and other web-based resources.
- Our proactive PR campaigns will focus on 'world-class' delivery within the seafood industry.
- We will actively monitor media coverage on the seafood industry and respond where necessary to protect our industry's interests.
- Our Advocacy programme will support our communications work, fostering a network of champions to promote the industry.

## Inform Decisions

### Information and data are readily available to inform decision-making

Accurate, timely data to inform decision making is the foundation of a successful industry and the basis of all our Seafish work.

As the authority on seafood, we pride ourselves on the quality of the data we provide and we will continue to work with all stakeholders to ensure they have access to the information they need.

### An ambitious agenda of work includes:

- The Seafish Risk Assessment for Sourcing Seafood (RASS), which enables commercial buyers to make informed choices with regard to purchasing seafood. The RASS tool is our primary source of information relating to seafood sourcing and includes data on biological factors (stock status, management, bycatch and habitat impact). Over the course of the full Corporate Plan, RASS will be expanded to include aquaculture, social and welfare factors, as well as nutritional signposts and culinary information.
- Our Regulation team brings together industry and Government, helping inform the legislative process.
- Our Integrity programme will provide information and advice on issues relating to product integrity, social responsibility and animal welfare.
- We will continue to communicate key industry performance information and provide the economic analysis and advice relied upon by industry.
- Through our Horizon Scanning programme we will seek to identify key areas of future activity and forward plan for longer term strategic thinking.

PROJECT	TARGETS 2017-2018	PROGRAMME
<p>The Advocacy programme is built around the outputs of our workstreams and Head of Advocacy works directly with Teams to support delivery of their objectives and outcomes. Key projects are identified and specific plans are developed to ensure maximum stakeholder engagement. Regular contact is maintained with the relevant project teams, and plans are fine-tuned to meet the developing needs of the project. RFS, RASS, FITD and the Issues Groups are current key tools in this process.</p>	<p>The Head of Advocacy has a dual role as RFS and RASS Ambassador, and provides maximum opportunities for stakeholder engagement and advocacy on a global scale.</p> <p>Advocacy is undertaken at meetings, events, conferences and seminars and through individual face-to-face meetings with key stakeholders, including Government.</p> <p>Advocacy is fundamental to the delivery of the Seafish Corporate Plan 2015-18, directly and indirectly contributing to the delivery of our mission, vision, objectives and outcomes. At a workstream level, time is allocated to specific projects within programmes as follows:</p> <ul style="list-style-type: none"> <li>• Responsible Sourcing / RFS: 20%.</li> <li>• Responsible Sourcing / RASS: 20%.</li> <li>• Insight / Issues Groups: 20%.</li> <li>• Enhance Reputation / Seafish Campaigns: 10%.</li> <li>• Enhance Reputation / Industry Support: 10%.</li> <li>• Promote Consumption / Seafish Campaigns: 10%.</li> <li>• Promote Consumption / Industry Support: 10%.</li> </ul>	<p><b>Advocacy</b></p> <p>Our Advocacy programme supports our communications work and fosters a network of champions to promote the industry. We identify key projects and specific plans to ensure maximum stakeholder engagement.</p> <p><b>WORK PROGRAMME OVERALL KPI</b></p> <p>Year-on-year improvement in stakeholder satisfaction score from baseline established in year one survey.</p> <p><b>WORK PROGRAMME ANNUAL TARGET FOR 2017-18</b></p> <ul style="list-style-type: none"> <li>• RFS - four retailers and two foodservice companies publicly committed, two standard holders publicly endorsing.</li> <li>• RASS - two retailers and one foodservice company publicly committed.</li> <li>• Issues Groups - 15 new members and Ethics CLG promotion at three international events.</li> </ul>

**PROGRAMME**

## Domestic Aquaculture

Guided by the Seafish Domestic Aquaculture Advisory Committee, the Domestic Aquaculture programme will deliver projects to support and expand the UK aquaculture industry, facilitating a collaborative approach to the delivery of local and national growth strategies.

**WORK PROGRAMME OVERALL KPI**

Year-on-year improvement in stakeholder satisfaction score from baseline established in year one survey.

**WORK PROGRAMME ANNUAL TARGET FOR 2017-18**

- National Government’s belief that the Seafish Domestic Aquaculture programme has contributed positively to their development of national strategies - measured by testimony.
- Positive testimonies received from key aquaculture industry representatives and policy makers in each devolved nation.

**PROJECT**

**DOMESTIC AQUACULTURE**

Ensure focused and relevant aquaculture information is readily available, and effective stakeholder engagement is executed, to facilitate informed decisions, support the UK industry in tackling key issues and constraints, and highlight opportunities for growth.

**TARGETS 2017-2018**

**AQUACULTURE RESOURCES AND OUTREACH**

- Convene two Seafish Domestic Aquaculture Advisory Committee (SDAAC) meetings and circulate two updates to committee members per year.
- Completion of SDAAC initiated ‘Water Quality and Shellfish Aquaculture’ report and dissemination of findings.
- Phase 2 of the Cefas ‘Aquaculture Regulatory Toolbox for England’ hosted on the Seafish website.
- Increase our on-line aquaculture resources by continuing to re-work, update and develop our aquaculture web pages.
- Improve existing Seafish aquaculture information, such as the shellfish depuration guides, and facilitate the promotion of UK aquaculture within seafood campaigns and promotional / trade events.
- Ensure a Seafish presence at a minimum of three major aquaculture-related events (UK or abroad).
- Continue our association with existing UK aquaculture initiatives such as Blue New Deal and those developing through the Seafish Strategic Investment Programme (SIP), whilst forging relationships to support strategic new initiatives designed to assist UK aquaculture growth such as the BBSRC / NERC Aquaculture Network.
