**Attention: Please consult the
Kingfisher Fortnightly Bulletin and
www.fishsafe.eu for updates on the status
of wellheads and positional changes.**

Suspended Wellhead Information

After initial drilling, a well may be temporarily suspended if an operator intends to carry out further operations at a later date. In this event a guide base is left on the seabed to facilitate re-entry. The structure resembles an inverted table, approximately 12 feet square with legs some 12-15 feet high. A central pipe about 20 inches in diameter normally projects about 10-15 feet from the seabed. These wellheads are not usually marked by buoys, however some operators may do so at their discretion.

The positions of underwater structures previously listed in the Yellow Card Part II, are now available in a more comprehensive form as electronic chart plotter overlays.

**For further information please contact Kingfisher
Information.**
