KTN's Objectives

- Increase business led R&D
- Facilitate exploitation of R&D to capture more value from innovation
- Increase collaboration between businesses (B2B) & between businesses and the research base (B2R) for UK benefit

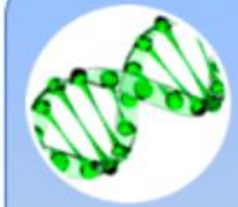
  - ✓ We Connect, Support and Inform
  - ✓ We are Strategic, Impartial and Trusted

We're here to help

KTN – Industry sectors

Focus is on bringing together groups that would not normally meet

Materials
Chemistry
Environmental
Services



Agri-Food
Biosciences

KTN Landscape Maps

Aquaculture map?

-ARCH-UK & Seafish proposed an aquaculture specific map to help connect/inform the community

-Aquaculture information lacking on KTN's Agri-food map

-No impartial continuously updated 'snap shot' of UK Aquaculture activity

Proposed Landscape Map

The UK aquaculture community

List of possible attributes for a UK Aquaculture Landscape to include:

Underpinning Organisations (Government bodies, Regulators, etc.)

Funders

Trade Bodies

Interest groups (NGOs, etc.)

Companies (technology providers, feed, production, etc.)

Academia/Research groups

Training Providers

Independent Consultants

Insurance Providers

Certification Schemes

Trade media sources

Proposed Landscape Map

Filters and extras

Other useful information/functions to include - a wish list:

-Inclusion of food and non-food aquaculture

-Filter by: regional/national, food/non-food, onshore/inshore/offshore, etc.

-Current relevant funding

-Previously funded research projects

Proposed Landscape Map

List of research activity

A way of clarifying/keeping track of who is currently undertaking what aquaculture research and where so other researchers/research bodies are aware of what's being done around the UK:

–Highlight gaps in current research and help focus funding bids

–Prevent duplication of work

–Help collaboration/relationship building between researchers & industry

Thank you
