East Coast Dredging/Fisheries Liaison – Issues Update Q1 2014

As a result of discussions at previous East Coast Dredging/Fisheries Liaison Committee meetings, a decision was taken to trial some alternative arrangements from June 2012 onwards.

These would see a single annual liaison committee meeting taking place during the summer (June/July), with the traditional winter meeting replaced by a written Issues Update which would be circulated electronically. The production of the Issues Update and its circulation would be coordinated by the British Marine Aggregate Producers Association.

The thinking behind this change was that the lines of communication and contacts were now sufficiently well developed to allow any site specific liaison issues to be addressed on a bi-lateral basis. As a consequence, the committee had evolved towards a platform to report updated general information against standing agenda items. Rather than holding a winter meeting for this purpose, it was agreed that these updates could potentially be achieved equally well via a written report.

Following discussions at the liaison committee meeting which took place on the 27th June 2013, it was agreed to continue with this approach. The second of these Issues Updates is therefore now available via the links below, together with a separate document provided by MMO which provide an update on the status of all marine aggregate licences and applications in the Eastern region.

The usefulness and effectiveness of this approach will be reviewed at the next formal meeting of the liaison committee, which will be arranged to take place at a suitable East coast venue in June/July 2014. Details of the venue and timing will be circulated 8 weeks prior to the meeting date.

The marine aggregate industry are committed to maintaining the levels of liaison and engagement with the commercial fishing sector. Therefore if any issues arise outside of the established liaison committee meeting cycle that are unable to be resolved through bi-lateral discussions, there is the option to arrange issue-specific meetings to address these.

Equally, if there are any comments on the information provided in the Issues Review, or suggestions for other information that could usefully be included, these should be sent to bmapa@mineralproducts.org so they can be considered at the summer liaison meeting.

Regional Active Dredge Area Charts – Issue 23 now available

Regional Active Dredge Area (RADA) charts are routinely produced by the British Marine Aggregate Producers Association (BMAPA) and The Crown Estate on a bi-annual basis (charts are dated 31st January and 31st July) to show where dredging operations are currently permitted within existing marine aggregate production licences.

Areas where dredging is permitted are monitored through the approved Electronic Monitoring System (EMS) that is required to be installed on every marine aggregate dredger operating in UK waters.

Issue 23 of these charts (dated 31st January 2014) is now available to be downloaded from http://www.bmapa.org/issues/other_sea_users.php

The need for working areas within production licences can be defined through existing licence conditions or through individual marine aggregate operators' voluntary management arrangements. Any changes in area or zone from the previous issue (dated 31st July 2013) will be highlighted in red.

For further information on these charts can be obtained by contacting: bmapa@mineralproducts.org

New Marine licence for Marine Aggregate Dredging

On behalf of Northwood Fareham Ltd and Volker Dredging Limited, this is to advise that a Marine Licence for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) to allow continuation of dredging on Area 351.

It is anticipated that operations will commence on or after 1st April 2014 and both the northern and southern areas will be available simultaneously. The duration of the Licence is 15 years.

As required by the Fisheries Code of Practice, Masters of Dredging vessels will call up on VHF 16 when approaching the dredging area at a range of 10nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

Marine Licence

First Published: 13 February 2014 | **Latest Updated: 13 February 2014**

New Marine licence for Marine Aggregate Dredging

On behalf of Hanson Aggregates Marine Limited this notice is to advise that a Marine Licence for trial cargos for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) for a new area (Area 492, Sole Pit).

It is anticipated that operations will commence on or after 18th February 2014 and the trial cargos will be completed before 13th April 2014.

As required by the Fisheries Code of Practice, Masters of Dredging vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10 nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

S.East of St. Catherine's Point – New Marine licence for Marine Aggregate Dredging

On behalf of CEMEX UK Marine Limited, this is to advise that a Marine Licence for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) for a previously dredged area (Area 407, south east of St Catherine's Point).

It is anticipated that operations will commence on or after 14th March 2013 and the duration of the Licence is 15 years.

As required by the Fisheries Code of Practice, Masters of Dredging vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10 nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.
