Notice To Fishermen

Regional Active Dredge Area Charts – Issue 24 now available

Regional Active Dredge Area (RADA) charts are routinely produced by the British Marine Aggregate Producers Association (BMAPA) and The Crown Estate on a bi-annual basis (charts are dated 31st January and 31st July) to show where dredging operations are currently permitted within existing marine aggregate production licences.

Areas where dredging is permitted are monitored through the approved Electronic Monitoring System (EMS) that is required to be installed on every marine aggregate dredger operating in UK waters.

Issue 24 of these charts (dated 31st July 2014) is now available to be downloaded from http://www.bmapa.org/issues/other_sea_users.php

The need for working areas within production licences can be defined through existing licence conditions or through individual marine aggregate operators’ voluntary management arrangements.

Any changes in area or zone from the previous issue (dated 31st January 2014) will be highlighted in red.

Hard copy laminated versions of these charts have been provided to local MMO offices for circulation to local fisheries interests, and hard copies can also be obtained by contacting bmapa@mineralproducts.org

For further information on these charts can be obtained by contacting: bmapa@mineralproducts.org

Marine Licence

New Marine Licence for Marine Aggregate Dredging – Area 228

On behalf of Volker Dredging Limited (VDL), this is to advise that a Marine Licence for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) to allow continuation of dredging on Area 228 off Great Yarmouth.

It is anticipated that operations will commence on or shortly after 1st January 2015 and the whole of the licence area will be available for dredging. The duration of the Licence is 15 years.

As required by the Fisheries Code of Practice, Masters of Dredging vessels will call up on VHF 16 when approaching the dredging area at a range of 10nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

On behalf of Britannia Aggregates Ltd and Volker Dredging Limited, this is to advise that a Marine Licence for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) to allow dredging on Area 498 in the Outer Thames.

It is anticipated that operations could commence on or shortly after 1st December 2014 and the whole of the licence area will be available for dredging. The duration of the Licence is 15 years.

As required by the Fisheries Code of Practice, Masters of Dredging vessels will call up on VHF 16 when approaching the dredging area at a range of 10nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

**Marine Licence**

**First Published: 01 July 2014 | Latest Update: 01 July 2014**

**Marine Licence for Marine Aggregate Dredging – Areas 511, 512 and 513**

On behalf of CEMEX UK Marine Limited this notice is to advise that, subject to a Marine Licence for marine aggregate dredging being issued by the Marine Management Organisation (MMO) dredging will commence on Areas 511, 512 and 513. The areas are dredged at present under Marine Licences for Areas 251, 319 and 360.

It is anticipated that operations will commence under the new Marine Licence in week commencing 23rd June 2014, subject to the issue of the Marine Licence.

As required by the Fisheries Code of Practice, Masters of Dredging vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10 nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

**Marine Licence**

**First Published: 25 March 2014 | Latest Update: 25 March 2014**

**New Marine licence for Marine Aggregate Dredging**

On behalf of Hanson Aggregates Marine Limited this notice is to advise that a Marine Licence for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) for the existing marine aggregate extraction Area 106 and new marine aggregate extraction Area 400 (adjacent to Area 106) (Humber). It is anticipated that operations will commence on or after 1st April 2014 and the licence is valid until 2035.

As required by the Fisheries Code of Practice, Masters of Dredging vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10 nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.
