Active Dredge Charts

Regional Active Dredge Area Charts - Issue 25 now available

Regional Active Dredge Area (RADA) charts are routinely produced by the British Marine Aggregate Producers Association (BMAPA) and The Crown Estate on a bi-annual basis (charts are dated 31st January and 31st July) to show where dredging operations are currently permitted within existing marine aggregate production licences.

Areas where dredging is permitted are monitored through the approved ‘black box’ Electronic Monitoring System (EMS) that is required to be installed on every marine aggregate dredger operating in UK waters.

Issue 25 of these charts (dated 31st January 2015) is now available to be downloaded from http://www.bmapa.org/issues/other_sea_users.php. The need for working areas within production licences can be defined through existing licence conditions or through individual marine aggregate operators’ voluntary management arrangements.

Any changes in licence area or active zone from the previous issue (dated 31st July 2014) will be highlighted in red.

For further information, please contact: Mark Russell, BMAPA, Email: bmapa@mineralproducts.org

Survey

Marine Aggregate Survey Notification – Area 460 (English Channel)

On behalf of CEMEX UK Marine Ltd, Hanson Aggregates Marine Ltd and Lafarge Tarmac Marine this notice is to advise that a geophysical survey is due to commence shortly in existing marine aggregate extraction Area 460 (English Channel region).

It is anticipated that operations will commence on or after 2 March 2015 and take approximately 1 month to complete (weather dependent).

As required by the Fisheries Code of Practice, Masters of vessels will call up on VHF Channel 16 when approaching the licence area at a range of 10 nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the survey vessel and fishing vessel(s) if required.

For further information, please contact: Louise Mann, Hanson Aggregates, Email: louise.mann@hanson.biz Tel: +44 (0) 7583 158393

Marine Licence

New Marine Licence for Marine Aggregate Dredging – Area 515 Humber

On behalf of Hanson Aggregates Marine Ltd this notice is to advise that a vibrocore sampling campaign is due to commence shortly in existing marine aggregate extraction Area 447 (Outer Thames) and Area 435 (South Coast region).

It is anticipated that operations will commence on or after 9th February 2015 and take approximately 1 month to complete (weather dependent). As required by the Fisheries Code of Practice, Masters of vessels will call up on VHF Channel 16 when approaching the licence area at a range of 10 nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the survey vessel and fishing vessel(s) if required.

New Marine Licence for Marine Aggregate Dredging – Area 515 Humber

On behalf of Westminster Gravels Limited this notice is to advise that a Marine Licence for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) to allow the continuation of dredging within Area 515 (formerly Area 440 and 441/2).

It is anticipated that dredging under the new Marine Licence will commence on 1st January 2015.

As required by the Fisheries Code of Practice, Masters of dredging vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

For further information, please contact: Ian Taylor, Tel 01489 885933, Email ian.taylor@boskalis.com

New Marine Licence for Marine Aggregate Dredging – Area 197

On behalf of Lafarge Tarmac Marine Ltd this notice is to advise that a Marine Licence for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) to allow continuation of dredging within Area 197.

It is anticipated that dredging under the new Marine Licence will commence on 1st January 2015.

As required by the Fisheries Code of Practice, Masters of dredging vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

For further information, please contact: Simon Luckett, Tel: +44(0)1243817234, Email: simon.luckett@lafargetarmac.com
New Marine Licence for Marine Aggregate Dredging – Area 514

On behalf of CEMEX UK Marine Limited this notice is to advise that, a Marine Licence (L/2014/00399/1) for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) to allow dredging on Area 514. The duration of the licence is 15 years.

Parts of Area 514 are dredged at present under Marine Licenses for Areas 102 and 105. Operations will continue under the new Marine Licence from 1st January 2015.

As required by the Fisheries Code of Practice, Masters of Dredging vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10 nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

For further information, please contact: Joe Holcroft, CEMEX UK Marine Ltd, Tel: 023 8072 0217 email: joseph.holcroftj@cemex.com
Survey

Marine Aggregate Survey Notification

Please be advised that for a period between the 19 February 2015 and the end of March 2015 the marine aggregate industry will be undertaking seabed grab surveys at the locations detailed below.

The surveys will employ a Hamon grab to obtain sediment samples of the seabed. A drop down video system may also be employed at locations where grab surveys are unsuccessful in acquiring sediment samples.

The works will be completed by personnel from APEM Ltd on the vessel MV Flatholm.
