Moray Offshore Renewables Limited – Met Mast Installation

Please be advised that Drace Infraestructuras UK Ltd is undertaking the installation of a meteorological mast for the Moray Offshore Renewables Limited offshore wind farms (Telford, Stevenson and MacColl). This work is being undertaken in support of the development of The Crown Estate Round 3 Zone 1 offshore wind licensing on the outer Moray Firth off the East coast of Scotland.

The Works
Remedial works on the met mast are close to completion with the next phase involving approximately four weeks for auxiliary works and ladder re-installation and three weeks for instrumentation installation and commissioning. The target date for completion of the works is 01 May 2015. All dates are subject to suitable weather conditions.

The co-ordinates for the corners of the embankment of the met mast are provided in the table below.

Neart na Gaoithe Offshore Wind Farm – Metocean Buoy Deployment (NAREC)

Neart na Gaoithe Offshore Wind Limited has deployed two metocean buoys at the National Renewable Energy Centre (Narec) Blyth, to measure (1) wind speed and direction and (2) waves and currents; both buoys are deployed alongside each other. Both buoys are painted to IALA standard, have an amber navigation light set to flash 5 times at 1Hz every 20 seconds.

Buoy (1) is moored using two delta flipper anchors with riser chains (max. 250m each). There are two pennant buoys floating on the surface above each of the two seabed anchors associated with the buoy. The pennant buoys are yellow, 1m long, diameter of 0.5m and are unlit. They are attached to the anchors by steel wire. Buoy (2) is moored via a single bungee line. The buoys are deployed at Narec, at approximately the following co-ordinates:

1. FLIDAR buoy (92m drift radius) 55°08.726’N 001°25.154’W
   a. FLIDAR anchor pennant buoy 1 55°08.858’N 001°25.143’W
   b. FLIDAR anchor pennant buoy 2 55°08.620’N 001°25.120’W
2. Wave Rider Buoy (82m drift radius) 55°08.625’N 001°25.261’W

Please note that there is a requirement for wide berth when passing the buoys due to their large excursion, as a result of their mooring configurations.

Buoy (1) was deployed on 10th February 2015 and will be removed by April 10th 2015.

</tr>
</tbody>
</table>

Installation and commissioning works are complete for the time being. One final visit to certify the equipment will be undertaken in April 2015. This activity will involve one crew transfer vessel, vessel details to be confirmed.

Installation of the remainder of the instruments and other works are planned for May/June 2015.

### Scour protection

Preliminary scour protection works will be undertaken in April 2015 with the remainder of the works being undertaken in April/May 2015.

Preliminary works to be performed in April 2015 will consist of installing several gravel bags at the caisson corners. Those works will be performed using the C-Odyssey.

Seabed Activity

London Array Wind Farm – Cable Crossings.

Three special marks and a South Cardinal Mark have been installed to mark the four rock berms on the crossing of the Kentish Flats and London Array Export cable. At these crossings the typical sea bed level was -4m LAT. Due to the newly installed rock beam the depth in some areas is now -1.0m LAT.

Kentish Flats/London array cable crossings have marker buoys at the following locations:

1. 51°25.56'N 001°06.45'E (KFSM1)
2. 51°25.00'N 001°06.44'E (KFSM2)
3. 51°24.86'N 001°05.77'E (KFSM3)
4. 51°25.41'N 001°05.69'E (KFSM4)

Survey

The survey vessel Spectrum 1 is conducting cable surveys on site and along the export cables.

Rock Berm

BritNed cable crossing (51° 28.583N, 001° 17.417E) the seabed level varies from -6.5m LAT to -9m LAT. Due to the newly installed rock berm the depth in some areas is -4m LAT. A North Cardinal Buoy has been installed in the following position:

1. Named BRIT NORTH 51°28.718N 001° 17.50E North Cardinal exhibiting Q light characteristic

Seabed Activity

Westermost Rough Wind Farm – Development

Installation at the Westermost Rough wind farm continues, with all monopiles and tee pieces installed and 18 or 35 turbines now with generators and commissioned.

The boundary for the wind farm is:

1. 53 46.131 N,000 08.365 E
2. 53 48.722 N,000 05.235 E
3. 53 50.575 N,000 09.615 E
4. 53 47.982 N,000 12.743 E
5. 53 46.131 N,000 08.365 E

For further information: Marine Coordinators, Tel: +447776170914, Email: mcwmr@dongenergy.co.uk

Seabed Activity

Humber Gateway Offshore Wind Farm – Foundation Installation Phase 1

Construction of the wind farm is continuing as detailed below:

- Rock Bag Campaign – Inshore export cable route continuing from 20 Mar 2015 (53°38.743’N 000°08.387’E)
- Array Cable Installation - Inter-array cable installation is continuing.
- Foundation and WTG Installation - MPI Resolution: Vessel will be installing 6 WTG’s per cycle.

Please note all peripheral foundations installed have Temporary Navigational aids fitted and are all operational.

Survey

Hornsea One Offshore Wind Farm – Survey

Please be advised that DONG Energy Wind Power AS (DONG) has contracted Fugro to carry out geotechnical investigations for the proposed Hornsea Project One Offshore Wind Farm, as bounded by the coordinates below:

1. 53°49.236’N 001°37.373’E
2. 53°55.414’N 001°38.457’E
3. 53°56.715’N 001°40.100’E
4. 53°56.940’N 001°41.501’E
5. 53°56.390’N 001°48.324’E
6. 53°57.252’N 002°02.654’E
7. 53°57.252’N 002°06.688’E
8. 53°57.252’N 002°11.877’E
9. 53°57.252’N 002°15.740’E
10. 53°57.252’N 002°17.400’E
11. 53°57.252’N 002°19.200’E
12. 53°57.252’N 002°20.100’E
13. 53°57.252’N 002°20.800’E
14. 53°57.252’N 002°21.700’E
15. 53°57.252’N 002°22.600’E
16. 53°57.252’N 002°23.500’E
17. 53°57.252’N 002°24.400’E
18. 53°57.252’N 002°25.300’E
19. 53°57.252’N 002°26.200’E
20. 53°57.252’N 002°27.100’E
21. 53°57.252’N 002°28.000’E

The commencement of the Gargano will be the 12 March 2015. The exact finish date is dependent on the prevailing weather conditions, etc., but the forecasted completion date as of the publication date of this notice is the 24 March 2015.

For further information: Nick Garside, FLO, Mob: +44 (0) 7538 827 013 Email: nick.garside@live.co.uk

Notice to Fishermen

Race Bank Offshore Wind Farm – Survey

Notice is hereby given that DONG Energy (Race Bank) will commence survey operations along the entire route of the Export Cable Route and Offshore Wind Farm site at Race Bank, commencing 1 March 2015. The surveys are expected to be on going for the next three years.

Vessels will be carrying out acoustic surveys, obtaining Benthic grab samples, underwater photography, magnetometer surveys and therefore will have equipment deployed in the water column close to the sea bed.

Kingfisher Fishing Plotter Files have been produced outlining the Clearance Zones of the wind farm and export route. For more information, please contact the undersigned.

For further information: Hywel Roberts, DONG Energy, Tel: +44 (0)20 7811 5486, Email: hywro@dongenergy.co.uk
Teesside Offshore Wind Farm – Survey

A geophysical survey programme is planned to commence within the boundaries of the Teesside Offshore Wind Farm as soon as a suitable weather window allows. The earliest mobilisation date for the vessel is the 5th March 2015 depending upon weather.

1. 54°38.024’N,001°05.187’W
2. 54°39.025’N,001°07.389’W
3. 54°39.275’N,001°06.759’W
4. 54°39.365’N,001°06.005’W
5. 54°38.338’N,001°03.744’W
6. 54°38.226’N,001°04.675’W
7. 54°38.024’N,001°05.187’W

The works will involve the vessel MV Lia undertaking both multi-beam and side scan sonar surveys within the wind farm.

For further information: Simon Prince, Specialist Marine Consultants Ltd, Tel: +44(0)1723 892861 email: simonp@smchse.com

Gunfleet Sands Wind Farm – Cable Exposures & Maintenance Activities

DONG Energy Gunfleet Sands have three notices to mariners for the attention of fishermen.

Firstly, work is planned to be undertaken somewhere between the dates of early March 2015 & late March 2015. The works will be undertaken by ‘Tiger’ a Motor Hopper, Length x Breadth: 100 m X 20 m, Call Sign: LXXX MMSI: 253447000.

Secondly, work is planned to be undertaken somewhere between the dates of 12th October & mid April 2015. The works will be undertaken by ‘Seaworker’ a towed jack up, Length x Breadth: 55.5 m X 33 m, Call Sign: OYRN2 MMSI: 219015441 IMO: 8769705.

Finally, three sections of the export cable remain vulnerable.

1. 51°48.264’N 001°12.796’E – 11m exposure.
2. 51°44.702’N 001°13.534’E – 9.3m exposure / 0.8m above the seabed.
3. 51°43.795’N 001°13.570’E – no exposure, scour at base of turbine.

For information relating to the export cable, please contact: Jonny Lewis – Environmental & Consents Adviser to TC Gunfleet OFTO Ltd, E: jonny.lewis@marinespace.co.uk M: 07817 644284

For further information: Duncan Potter, DONG Energy, Tel. +44 (0) 7891 966 595, Email: duncanpotter@dongenergy.co.uk
Seabed Activity

Wave Hub Wave Data Buoy – Deployment and Protection Works

Please be advised of two Notice to Fishermen that are currently in operation for the Wave Hub site.

**Deployment**

Fugro Emu are scheduled to deploy a Wave Data Buoy at the Wave Hub offshore test site for up to five years. The works are to be completed at the first weather opportunity after 30 March 2015 and the buoy and works relating will be confined within the Wave Hub Development Area which mariners should avoid as usual.

Position: 50°20.834’N 005°36.850’W (Depth: ~52m below LAT)

The data from the buoy will be shared via the Channel Coast Observatory for the benefit of all mariners operating in the area: [http://www.channelcoast.org/southwest/](http://www.channelcoast.org/southwest/)

**Protection Works**

Please be advised that Mojo Maritime Ltd are scheduled to undertake cable protection works using vessel M/V Stril Explorer on the Wave Hub subsea power cable.

The works are constrained to a 110m section of cable in the mouth of St Ives Bay as follows:

For further information:

**Deployment** = Matthew Linha, Fugro EMU, Tel: 02392 205 503, Email: matthew.linham@fugroemu.com

**Protection** = Lucas Lowe-Houghton, Mojo Maritime Limited, Tel: 01326 218218, Email: lucas.lowe@mojomaritime.com
**Seabed Activity**

**West of Duddon Sands Offshore Wind Farm – Construction**

All of the turbines have been installed but the wind farm has not yet been commissioned. All of the Inter-Array or Infield cables have been buried and a burial depth survey to confirm depth and acceptance is being carried out as weather and conditions permit, these surveys will be carried out by two vessels ‘MS Line’ and ‘Sander 2’.

- Discontinuance of fog horn signal at the SW corner of Walney 1 Wind Farm - Turbine F01 54°00.135’N 003°33.382’W
- The Wave Rider Buoy in Lune Deep has been moved to a new position: 54°00.080’N 002°58.370’W FLY(5) 20s-range 1nm
- There is a Wave Rider Buoy in position : 54°00.000’N 003°26.000’W FLY(5) 20s - range 1nm All Turbines have been installed.
- Rock Dumping has been carried out at positions along both Export Cables, please contact me if you are unsure about any of these positions.

**Seabed Activity**

**Ormonde Offshore Wind Farm – Export Cable Route Survey / Buoys**

A Survey along the length of the Ormonde Export Cable, from the Sub-Station at Ormonde along and into the landfall at Heysham, is continuing.

While on site ‘MV Proteus’ will be towing highly sensitive equipment at up to 300 metres behind the vessel, which will limit manoeuvrability. A wide berth is required at all times and if possible passing vessels are requested to reduce speed.

The missing South and West Cardinal Buoys have not been located. All mariners are requested to keep a lookout for any drifting buoys and either contact the undersigned or the Ormonde Wind Farm direct on 01229 311118.

New replacement buoys are being sourced and they will be installed shortly. The position of the buoys when on station at Ormonde are:

- South Buoy – N18039 54°03.79’N 003°25.43’W
- West Buoy – N18043 54°05.51’N 003°28.69’W

Gwynt y Môr Offshore Wind Farm – Construction Activities

Windfarm construction is complete. Commissioning of the windfarm continues and rock armour layer / cable protection work continues at various locations on site.

There are currently two Notices to Mariners in force for the windfarm site:

1. FLIDAR Anchor buoyage - two navigation buoys are in place to mark the locations of 3 anchors on the seabed.
2. Mariners are advised that the flashing light on one of the navigation buoys is reported to be faulty, and to navigate with caution in the vicinity of these buoys during hours of darkness / poor visibility.

For a copy of the Kingfisher Awareness Flyer for the Gwynt Y Mor Offshore Wind Farm, please contact the undersigned. Alternatively, click on the link below, or visit www.kingfishercharts.org
