* The Hazard List is a collection of potential fishing hazards supplied to Kingfisher from across all offshore industries. Potential hazards will be listed for 6 months.*
Exposed Cable Sections – SHEFA 2 Subsea Cable

The Shefa-2 submarine cable, running between Banff, Orkney, Shetland and Faroes has suffered from several cable breaks since deployment in 2007. A re-deployment was completed successfully late in 2014 and the majority of exposed areas are now buried.

However, Shefa urgently has to stress that a further few areas of the Shefa-2 segment 7, 8 & 9 are unburied and therefore exposed. Especially we need to highlight a limited exposed area on the segment running between Manse bay in Orkney and Banff in Scotland between the following positions:

A: 58°47.208’N 002°46.617’W and
B: 58°47.300’N 002°46.763’W

This area represents a hazard to fishing and should be avoided at all times. The latest route of the cable may be seen on the KIS-ORCA Fishing Plotter disk released January 2015 and may be downloaded from www.kis-orca.eu/downloads

For a copy of the Kingfisher Awareness Flyer, showing the exposed sections of SHEFA from December 2013, please contact the undersigned. Alternatively, click on the link below, or visit www.kingfishercharts.org

For further information: Tel: +298243602, Email: phv@ft.fo, brr@ft.fo
Notice To Fishermen

Cable Repairs – Concerto 1 North

Recently there have been several repairs to the Concerto 1 North cable due to the mobile nature of the seabed. These repairs are post repair buried but remain more vulnerable than other sections of the cable. For all details of the current status of the cable please see the up to date Kingfisher Awareness Flyer. This may be obtained by clicking the link below or by visiting www.kingfishercharts.org

Please note that the following chart has been updated.

Hazardous Condition of Cable – Ulysses South Landing (St Margaret’s Bay)

Please note that further to earlier notices, the Ulysses South submarine cable landing at St Margaret’s Bay, near Dover, remains broken at position: 51°08.70’N 01°24.06’E. This position lies approximately 1.3km offshore in a water depth of 15 metres.

As a result of this fault, the cable at the approaches to St Margaret’s Bay has been dragged an indeterminate distance to the north of its as laid route on either side of the fault position. Caution should therefore be exercised in this area until the cable repair operation has been carried out.

A map of the hazardous position may be seen by clicking on the ‘Map Link’ in the top right corner

For further information: Steven Bennett, Global Marine, Tel: +44 7557 908179 email: Steven.bennett@globalmarinesystems.com
Exposed Cable Sections – Apollo South Cable (Southwest Approaches)

On behalf of Apollo SCS Ltd, fishermen are advised that following a recent repair to the Apollo South subsea telecoms cable there now exists a section of exposed/unburied cable in the vicinity of

49°04.76N Long 006°41.59W

Due to the nature of the seabed in this area the cable is exposed and could be a hazard to fishing. Fishermen are asked to ensure that they have the route of the Apollo South cable accurately plotted on their fishing charts. Trawler skippers are respectfully asked to exercise caution when trawling in the vicinity of the Apollo South cable and to keep beyond a distance of at least 500 metres from the charted cable route and where at all possible to avoid trawling directly over the cable route. Static gear fishermen are advised not to deploy anchors and end weights in close proximity of the cable.

For further information: Colin Richards, Apollo SCS, Tel: +44(0) 1404 46323  email: colinrichards@networkmarinefsnet.co.uk

Exposed Cable Section – FLAG Atlantic Subsea Cable

Please be advised that there is a section of the FLAG Atlantic Subsea cable that is unburied. This area represents a hazard to fishing and skippers should exercise caution whilst fishing in the vicinity. The coordinates below highlight the exposed area and the cable splices, which also pose a hazard to fishing.

1. 48°49.407N 002°35.545W Start of exposed section
2. 48°49.333N 002°35.417W Splice
3. 48°47.988N 002°35.137W Splice
4. 48°47.725N 002°35.088W Splice
5. 48°47.567N 002°34.976W Splice
6. 48°46.878N 002°35.083W Splice
7. 48°46.702N 002°35.077W Splice
8. 48°46.564N 002°35.187W Splice
9. 48°45.380N 002°35.083W End of exposed section

Notice to Fishermen
Exposed Cable Sections – CIEG Guernsey (Jersey 90kv Subsea Power)

Published: 16 April 2015  |  Latest Update: 16 April 2015

Please be advised that due to recent repair works, two sections of cable remain unburied. Cables and joints are lying exposed on the sea bed and are a hazard to fishing and at risk of being damaged.

Cable Repair 1 – Jersey to Guernsey (2012)
The repaired sections lay between 49°22.736’N 002°29.220’W and 49°22.360’N 002°28.494’W and has a hairpin bight facing west south west extending for 370 meters to 49°22.610’N 002°29.412’W as shown in the image within the Map Link.

Cable Repair 2 – Jersey to Guernsey (2015)
The repaired sections lay between 49°26.965’N 002°31.422’W to 49°26.873’N 002°31.125’W where it then heads south to 49°26.584’N 002°31.191’W. The hairpin bight facing west south west extending for 70 meters to 49°26.887’N 002°31.321’W as shown in the image within the Map Link.

Please exercise caution when carrying out work such as trawling in these areas.

A map of the cable repairs can be seen by clicking on the ‘Map Link’ in the top right corner.

Notice To Fishermen
Hugo Seg 1 – Cable Repairs

Published: 02 June 2015  |  Latest Update: 02 June 2014

Following a recent work on the Hugo subsea cable, there remains vulnerable and hazardous sections. Due to the nature of the sea bed, although all efforts had been made to bury the cable and associated joint boxes, only minimal or reasonable coverage was achieved.

Section 1 – Repair section of over 4km including final splice bight (minimal coverage)
Extreme caution should be exercised if working between: 49°39.163’N 004°59.495’W and 49°38.310’N 004°56.427’W

Section 2 – Repeater installation at 49°35.576’N 4°46.785’W (minimal coverage)
Extreme caution should be exercised if working between: 49°35.657’N 004°47.079’W and 49°35.519’N 004°46.553’W

Section 3 – Repeater installation at 49°36.675’N 3°35.045’W (reasonable coverage)
Caution should be exercised if working between: 49°36.671’N 003°35.332’W and 49°36.675’N 003°34.752’W

A map of the cable repairs/installations can be seen by clicking on the ‘Map Link’ in the top right corner.

Published: 16 July 2015 | Latest Update: 05 November 2015

Moyle Returns Cable Project – Rock Protection

The vessel Rockpiper has completed rock protection work on the northern Moyle returns cable.

Vessels: Guard vessels will be stationed as appropriate along the cable routed during installation and burial to ensure the safety of marine users. These vessels are being supplied by the Scottish Fishermen’s Federation (SFF) and the National Federation of Fishermen’s Organisations (NFFO).

The laying of the south cable is currently scheduled to start on the 18th October 2015 and all protection work on this cable is due to be completed by 13th January 2016.

Activity       North Cable       South Cable

Notice To Fishermen  
Published: 26 March 2014 | Latest Update: 20 November 2015

Western HVDC Link Power Cable – Installation, Exposed Cable & Survey

Work on the installation of the first deep water cable of the Western HVDC Link in the Irish Sea between the Wirral and the Firth of Clyde recommended in July 2015

The cables will not be buried where they cross existing cables or pipelines, and also at locations where the seabed character has prevented cable burial. These sections of exposed cable will be buried at the earliest opportunity following the installation of the second campaign on this section of the cable route.

At crossing locations and other areas where the cable is exposed, guard vessels shall monitor the cable until appropriate post-lay protection (with concrete mattresses or rock placement) can be installed. The cable crossings and locations of exposed cable are all specified in the latest Notice to Mariners.

Vessels are requested to pass at a safe speed and distance from these locations and fishing vessels are advised to remain a safe distance (approximately 1.5 nautical miles) from the areas identified.

Guard Vessels have been deployed at each location to aid in monitoring the exposed areas of cable and to advise of safe distances locally.
Mariners shall be advised of any other locations where cable burial is not possible due to seabed conditions. The cable crossing locations are:

- **Hibernia Cable**
  - 53°45.058'N 003° 48.853'W
- **Sirius South Cable**
  - 53° 43.674'N 003° 48.733'W
- **ESAT2 Cable**
  - 53°42.492'N 003° 48.646'W
- **PL1030 Pipeline**
  - 53°31.491'N 003° 34.852'W
- **PL1032/1033 Pipeline**
  - 53°31.490'N 003° 34.840'W

For further information: Jim Andrews, Fisheries Liaison Officer, Tel: +44(0)7908225865 email: jim@awjmarine.co.uk

**Notice To Fishermen**

**Published: 08 October 2015 | Latest Update: 08 October 2015**

**Hazard - Hibernia Segment C – Abandoned Gear & Vulnerable Cable**

Incident involving a fishing vessel snagging its gear. GMSL’s understanding is the MCA advised the vessel (Siobhan 3) to slip it’s gear due to the proximity of the Hibernia Segment C subsea cable.

The position given was 53°50.340N:004°55.832W, south of the Isle of Man, although it cannot be confirmed if the gear was snagged on the cable.

For further information: Steven Bennett, Global Marine Systems Ltd, Tel: +44 1245 702113 email: Steven.Bennett@globalmarinesystems.com

---

**Notice To Fishermen**

**Published: 19 December 2013 | Latest Update: 13 June 2014**

**Fishing Hazard – Exposed Subsea Cable, Beam Trawl and Wire**

Please be advised that, following entanglement with a subsea cable, a beam trawl and scallop gear have been discarded at the position below.

The fishing gear is entangled with the subsea cable and poses a significant hazard to fishing (L: 10m x H: 2m). There is also over 80m of exposed cable in the vicinity, due to the trawl dragging the cable from its original position.

The position is: 55°22.915'N 06°35.917'W

It was advised that the fishermen cut away both sides of his fishing gear and up to 200 fathoms of wire rope.

An awareness chart of the area is available from: Steven Bennett, Global Marine, email: Steven.bennett@globalmarinesystems.com

Please exercise extreme caution whilst fishing in this area.

For further information: Alasdair Wilkie, Hibernia, Email: alasdair.wilkie@hibernianetworks.com, Tel: +44 1704 322 306, Mobile: +44 7850 770 577
