Support

The Kingfisher Bulletin is provided by the Kingfisher Information Service of Seafish, to promote the awareness of offshore hazards to fishing, new structures and zones and conflicting offshore operations. Support for the production of aggregate industry information is received from the British Marine Aggregate Producers Association (BMAPA) and The Crown Estate.

Information

Information contained within the Kingfisher Bulletin comes from a variety of sources, although is in the majority, supplied directly to Kingfisher from the offshore operating industry, or government licensing authorities.

Coordinates within the Kingfisher Bulletin are converted into World Geodetic System 1984 (WGS84) and displayed as degrees, minutes and decimal minutes, to three decimal places (ddd°mm.mmm'). Route or boundary coordinates may be simplified for ease of use.

Disclaimer and Limitation of Liability

Whilst reasonable steps have been taken to ensure its accuracy, the data contained in this Bulletin (“Bulletin Data”) is not verified. Neither Seafish nor British Marine Aggregate Producers Association or The Crown Estate (together the “Parties” and each a “Party”) makes any warranty, express or implied, as to accuracy, completeness or suitability for any particular purpose of the Bulletin Data. Except for any liability which cannot be excluded or limited by applicable law, none of the Parties shall have any liability to You, meaning any person, firm, partnership, corporate body or any other legal person receiving or otherwise using, or benefitting from the use of, Bulletin Data for any damage or losses (including indirect, incidental, special or consequential loss or damage) caused by any: (i) use of the Bulletin Data, or (ii) error or omission in the Bulletin Data. Notwithstanding the foregoing exclusion of liability, in the event that any of the Parties are found liable to You, then the Parties’ entire liability in such event, whether in contract, delict (including negligence) or otherwise, shall not exceed £1,000. The Admiralty Notices to Mariners should also be consulted.

The Hazard List is a collection of potential fishing hazards supplied to Kingfisher from across all offshore industries. Potential hazards will be listed for 6 months.
**Notice to Fishermen**

**Area 507 – Update**

It is now anticipated that extraction will commence on Area 507 (Marine Licence L/2014/00026/2) on or after 24th April 2017.

As required by the Fisheries Code of Practice, Masters of Dredging vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10 nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

**First Published: 09 February 2017 | Latest Update: 09 February 2017**

**New Marine Licence for Marine Aggregate Dredging – Area 494**

On behalf of Tarmac Marine Ltd this notice is to advise that a Marine Licence for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) to allow dredging within Area 494.

It is anticipated that dredging under the new Marine Licence will commence in early 2017 but no sooner than 16th March.

As required by the Fisheries Code of Practice, Masters of dredging vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

**Notice to Fishermen**

**First Published: 25 August 2016 | Latest Update: 25 August 2016**

**South Coast Fisheries Liaison Update – Q3 2016**

At the South Coast Dredging/Fishing Liaison Committee meeting that took place in February 2016, it was agreed to trial an alternative way of sharing relevant information relating to marine aggregate dredging activities and the commercial fishing sector. This would look to mirror the approach employed for the equivalent East Coast liaison arrangements since June 2012.

Both sectors agreed that while the local focus remained important, the lines of communication and contacts now existed to allow bi-lateral discussions to take place should any specific liaison issues arise. This had increasingly resulted in the liaison committee meetings becoming a forum for more general updates.

As an alternative, a single annual liaison meeting will continue to take place in the winter. This will then be supplemented by a written report that provides an update of issues to be circulated electronically, in place of the additional summer liaison committee meetings that has traditionally occurred.

The first South coast issues update has now been produced and is available to be downloaded via this web page: [http://www.bmapa.org/issues/other_sea_users.php](http://www.bmapa.org/issues/other_sea_users.php)

The usefulness and effectiveness of this approach as a replacement for the summer liaison committee meeting will continue to be reflected upon at the next meeting of the South Coast Dredging/Fishing Liaison Committee scheduled to take place during January/February 2017.

If you have any thoughts on the usefulness or relevance of the information contained within this update, or have any suggestions as to how the liaison arrangements between the marine aggregate and commercial fishing sectors can be improved we would welcome your comments via bmapa@mineralproducts.org

The first South coast issues update has now been produced and is available to be downloaded via this web page: [http://www.bmapa.org/issues/other_sea_users.php](http://www.bmapa.org/issues/other_sea_users.php)
On behalf of Hanson Aggregates Marine Ltd this notice is to advise that the vibrocore sampling campaign due to commence in existing marine aggregate extraction Areas 106/400 & 480 in the Humber region has been delayed as a result of adverse weather conditions.

It is anticipated that operations will now commence on or after 10th March 2017 and take approximately 3 months to complete (weather dependant).

As required by the Fisheries Code of Practice, Masters of vessels will call up on VHF Channel 16 when approaching the dredging area at a range of 10 nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the vessel and fishing vessel(s) if required.

For further information, please contact: Louise Bridges, Hanson Aggregates Marine Ltd, Tel: +44(0)2380 828256  email: louise.bridges@hanson.biz
New Marine Licence for Marine Aggregate Dredging –South Coast Area 500/1-4

On behalf of Tarmac Marine Ltd, this is to advise that a new marine licence for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) for Area 500/1-4 south west of the Isle of Wight.

A trial dredge consisting of 2 cargoes is expected to be carried out in Area 500/3 during June and July 2017.

As required by the Fisheries Code of Practice, Masters of Dredging vessels will call up on VHF 16 when approaching the dredging area at a range of 10nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

Area 500/3

50°33.532’N 01°37.886’W
50°33.532’N 01°37.418’W

Geophysical and Grab Survey – South Coast Region

On behalf of the South Coast Dredging Association, this notice is to advise that a geophysical and benthic sampling campaign is due to commence shortly on the South Coast of England. Current date of commencement of operations is 8 May 2017 subject to existence of a suitable weather window.

The grab surveys will employ a Hamon grab to obtain seabed sediment samples. A drop down video system may also be employed at locations where grab surveys are unsuccessful in acquiring sediment samples. The geophysical survey will acquire multibeam and sidescan sonar. Multibeam sensors will be vessel mounted whilst the sidescan sonar sensor will be towed up to 100 m astern of the vessel. The work areas are focused around the aggregate dredging licence areas, with geophysical surveys extending up to 500 m beyond the limits of the licensed boundaries.

The grab survey works will be completed on the vessel ‘Meriel D’ (Call Sign 2BMQ7) and the geophysical survey will be completed from the ‘Geosurveyor XI’ (Call Sign 2GRS3).

It is anticipated that grab survey operations will begin in the west (Region 1) and work east, whilst the geophysical survey will start in the east (Region 4) and work west. The surveys will take approximately 12-16 weeks to complete once operations are underway, subject to weather. Further updates will be provided in this publication as the surveys progress.

For further information, please contact: Stuart Lowe, Regional Seabed Monitoring Programme Coordinator. Tel: 02380 381 945 or 07717 583 042, Email: rsmpc@marinespace.co.uk
Hazard to Fishermen – Lost Dredge Suction Pipe

Please be aware that a dredge suction pipe has been lost from a vessel in the south east of Marine Aggregate Area 392/393. The pipe is approximately 28.5m in length, 0.5m in diameter and is lying flat on the seabed in an east southeast orientation.

Mid point: 53°26.943’N 03°24.6913’W

For further information, please contact: Graham Singleton, Tel: 02380 720212, Email: graham.singleton@cemex.com
Scottish Association for Marine Science (SAMS) will be carrying out sediment sampling for scientific purposes in Loch Linnhe and Loch Etive, Argyll and Bute, Scotland, on May 2nd-3rd 2017. The work will involve a number of grab samples taken at two locations across the two day period, with the activity being carried out on the RV Seol Mara.

The locations are as follows:
Loch Linnhe   56°29.827’N 05°29.937’W
Loch Etive   56°27.046’N 05°11.574’W

For further information, please contact: Camilla Cassidy, NOC, email: camillacassidy@soton.ac.uk

Please be advised that the Scottish Association for Marine Science (SAMS) will be undertaking a small sediment grab survey in proximity to the Leven, Gorston and Ardgour fish farm sites within Loch Leven and Loch Linnhe.

The sampling activity is not extensive and will be completed within 2-3 days after starting. R.V. Seol Mara, which is a 10.4m research/survey vessel. The works will be flexible and can be moved/coordinated around other activities if essential. Survey work will only be undertaken during daylight hours. No fixed installations or equipment will be left on the seabed either during or after the survey.

The sampling will be undertaken within the following limits:

Within Loch Linnhe bounded by the points:
56°43.615’N 5°14.198’W
56°48.493’N 5°08.750’W
56°48.445’N 5°07.962’W
56°44.185’N 5°15.120’W
56°45.517’N 5°13.801’W

Within Loch Leven bounded by the points:
56°41.242’N 5°8.564’W
56°41.627’N 5°6.154’W
56°41.904’N 5°6.123’W
56°41.084’N 5°8.306’W

For further information, please contact: John Hausrath, SAMS, Tel: 01631 559 375 or 07825 525 215, email: john.hausrath@sams.ac.uk
